PolyStatic Floorcare

PolyStatic Dusters

Dust care and control is a fundamental and vital starting point for the majority of public area cleaning programmes, as indeed is spot cleaning when appropriate, but when based on the PolyStatic DISPOSABLE mop system, allowing for fully COST CONTROLLED operations, you really do have the best of both worlds.

For spot cleaning maintenance just choose the PolySprayMop with its own pump action integrated water tank on board and still using the same PolyStatic disposable mops means damp spot cleaning is quick and effective. When the mop is dirty and the floors look clean, throw it away and replace it with a clean one, it really is that simple and that good saving serious time and effort.

PolyStatic is our original electrostatic dust control material, 100% polyester, no added chemical impregnations and the more you use it the better it works but with no chemical residue left on the floor surface.

For dust control sweeping the PolyMop holder is both efficient and exceptionally convenient, anybody can use one anytime, so as and when time permits clean, dust free floors are quick and easy to achieve and are really an extra bonus for everybody.

PSM400

Dry system

The PolyStatic dusters cling to the special PolyMop 40cm cleaning head, held firmly in place by our special Xtra Grip Dust mop holder. The mops are 100% polyester, generating electrostatic precipitation by the movement over the surface being cleaned, the more you use it the better it works. It really does act as a dust magnet which is exactly what you want.

Eventually the mop will be dirty and need replacing; just throw away the old and put on the new. It really is that simple, cost effective and really appreciated by public and user alike.

PCM 400 / 401 / 403

Wet system

The advantages of disposable dust control with the PolyStatic system has equally been extended to spot cleaning where damp cleaning is necessary to ensure the removal of marks such as coffee spills, soft drinks, wet feet, etc, something MORE than just dust.

The PolySprayMop is a simple, convenient mop holder with its own built in liquid tank allowing the standard PolyStatic mop cloths to be used damp on the floor anytime, anywhere, which makes all the difference to the look of any public area. It really does look like you care, and really that's what cleanliness is all about but a fully disposable system just makes everything so much simpler and more practical, and truly cost effective.

PSM400

PolyStatic a real aid to improved standards.
